Having a robust business continuity management system is now recognized globally by many organizations as a key component in their risk management framework. This classroom-based course provides you with crucial knowledge on BS 25999 and is targeted towards managers and professionals working with business continuity management, risk management or operational excellence DNV is a gold partner with Business Continuity Institute(BCI), a leading organization working to promote the art and science of business continuity management worldwide. Course Contents:

The course will cover the topics such as:

- • BCMS Scope identification and Business continuity policy formulation
- • the critical activities in a company including their Impacts and Risks,
- • determining BCM Strategy,
- • developing a response and
- • exercising, maintaining and reviewing BCM.

Students will learn about identifying / implementing / evaluating the Critical Activities based on the business processes of an organization and the associated risks. Incident Management and Business Continuity planning will be covered and compliance to various applicable legislations will be discussed.

The students will learn about the Business Continuity Programme Management as defined in BS25999-1:2007 and other Best Practices.

They will understand the purpose, content and inter-relationship with other standards such as ISO 27001, ISO 19011 and ISO 20000-1:2005 and the legislative framework relevant to a BCMS.

Finally, they will learn about the role of an implementer / auditor and the PDCA methodology of planning, conducting, reporting and following up a BCMS audit in accordance with BS25999-1:2007 and other Best practices.

Course Benefits:

The students will after the course be able to interpret the requirements of BS25999-1:2007 for BCMS implementation / audit. Students will be able to check and confirm the BCMS objectives and carry out Business Continuity implementation and assessment based on BS25999-1:2007 and other best practices for organizations. Students will apply the BS25999-1:2007 standard clauses appropriately in an implementation / audit situation. Students will also be able to undertake the role of an implementer / auditor to plan, conduct, report and follow up a BCMS. Trainer: Mr. Nandakumar Shamanna

FEES (Inclusive of taxes, lunch & refreshments)

- Members: Rs. 1750.00
- Non-Member: Rs. 2500.00 ISO 27001:2005 & ISMS Lead Auditor Training for 5 days (IRCA and RABQSA Approved) Who should attend:
- Persons who will or wish to play a key role in implementing ISO 27001 in an organization
- Information Security Professionals (CISA/CISSP)
- Auditors who plan to conduct and lead Information Security Management Systems Audits

Companies are responsible for many information assets including their own financial and technical data, as well as information belonging to their customers. The penalties for losing, corrupting or wrongfully sharing information can be huge. Information Security Management is about the protection of information assets from potential security breaches. It relates to all types of information, including paper-based and electronic formats and determines how information is processed, stored, transferred, archived and destroyed. Working with specific requirements outlined in ISO/IEC 27001 and the additional guidance in ISO/IEC 17799, SAI Global's Information Security training will teach you how to develop the skills needed to audit an information security management system that protects information assets. The practical course provides a substantial degree of individual guidance and is designed and delivered using a competency based training approach; this means we guarantee application of learning by assessing the skills and knowledge of participants. SAI Global is conducting Information Security Management System ISO 27001 Lead Auditor Course approved by IRCA & RABQSA from 13th-17th Feb at a discounted rate for ISACA Members.

COBIT 4.1 for IT Governance and IT Assurance & a step by step methodology Date Saturday, 5th December 2009 Venue The Pride Hotel,

93, Richmond Road, Near Baldwin Girls Junior College

Bangalore 560 025 (Ph: +91.80.4348 4348) Time 9.00 am to 6.00 pm Fees Rs. 1,950/- for Members and Rs. 2,350/- for Non-Members (Inclusive of Taxes, Course Materials, Refreshments and Lunch) Download Brochure

Seminar Objectives:

The primary objective of this workshop is to present the participants with a practical perspective of using the COBIT 4.1 as Control and IT Governance Model for benchmarking and providing proactive assurance. Through case study discussions, participants will learn a systematic approach and implementation strategy on how to effectively use and efficiently integrate COBIT Model into their audits as required. Participants will learn how to implement COBIT 4.1 as the IT Governance model to which they can link their enterprise-specific operational and control requirements, policies, and standards. Participants will learn the step-by-step methodology designed by the speaker based on his extensive experience in using COBIT for IT Governance, IS Assurance and consulting assignments. Note: Those who have attended this 1-day workshop are eligible to attend the 2-day official workshop on "Implementing COBIT for IT Governance" without attending the COBIT Foundation course. Topics

1. Overview of IT Governance and COBIT

2. Understanding principles and components of COBIT 4.1

3. How to use COBIT 4.1 as control benchmark and for self-assessment

4. Practical approach to using COBIT 4.1 & step by step methodology

Key Speaker CA A. Rafeq, FCA, CISA, CGEIT, CIA, CCSA, DISA (ICAI) He is founder secretary and past president of ISACA, Bangalore chapter. Rafeq is providing specialized services in the areas of IT Governance, Information Systems Assurance, Consultancy, Implementation and Training for clients in India and abroad. He is considered as a pioneer in conducting IS Audits in India and using COBIT for IT Governance and IS Assurance. His special areas of interest are COBIT and CAAT software. He has extensive experience in auditing diverse technology platforms for clients in India and abroad. Rafeq has made presentations for various Professional Associations. He has conducted more than 150 days of training in India and abroad for IT and Audit professionals on IT Audit and COBIT®. Rafeq has made presentations and conducted COBIT

workshops at International Conferences held at Brunei, Sri Lanka, Thailand, Saudi Arabia, UAE, Singapore, Hong Kong, Malaysia, India, Philippines, Switzerland and USA. Who should Attend IT Auditors, IT Head, Consultants, Regulators, IT Security and Control Professionals, IT Managers, Audit Managers and IT Professionals who wish to learn how to use COBIT for providing proactive IT Controls Consulting, IT audit and assurance services. CPE Hours Members can earn 7 CPE hours in accordance with ISACA guidelines Register Online

- Members: Rs. 1950.00

- Non Members: Rs. 2350.00

Item Writing Workshop Date: 12th September 2009

Time: 5:00 PM - 9:00 PM, Followed by dinner

Venue: The Pride Hotels, 93, Richmond Road, Bangalore - 560025

Ph: +91.80.4348 4348 (Landmark: Near Baldwin Girls' High School) Background on Item Writing: An 'Item' is a question for ISACA's certification exams for CISA®, CISM® or CGEIT®. An item could be contributed by anybody, ISACA certification is not essential. There are thousands of such Items developed by volunteers. An item development goes through a structured and rigorous process of review. We'll learn more about it in this workshop. Items are always welcome by ISACA, but occasionally there is some need for items in specific domains. What a volunteer gains:

- Peps up creativity to design choices (options) of an item
- Boosts an applied research to come up with a stem (body) of an item
- Thus, encourages one to study the audit/ security/assurance domains
- Concrete gain of US\$ 50 (100 in some cases) per item accepted finally by ISACA
- Gain 4 CPE Credits for attending the session

Program Contents:

- About ISACA, 'Items' and Item Writing Guide
 - Basics of Item Writing
 - Vetting Process
 - Example of CISA Item
 - Example of CISM Item
 - Discussions on the items developed/ partly developed by participants (Please bring a few items you've developed for discussion)
- The Trainer: Dr. Pramod Damle heads the Education Services at MIEL e-Security Pvt. Ltd, Mumbai, where he is responsible for architecture and development of PRISM, an intensive, one-year academic program in information security management running in India and abroad. Besides, as an official instructor of ISC2, he engages preparatory programs for SSCP, CISSP, etc.

He has worked in many capacities, like IT Manager, Auditor, QA Advisor, Security Consultant, and also held a core academic stint as Professor and Head (IT) at YASHADA – the Government academy where senior officials including IAS, IPS and judges are trained. He brings a unique blend of Software development, QA & Info Security in BFSI & higher education arena. On the one hand he has contributed to banks/ IT houses and on the other, he has catered to academics at PG level at IIMs, Symbiosis, Pune Univ, IGNOU, CSI, ISACA, ISC2, etc.

Instructed in Math's and IT, he holds CISA, CISM, SSCP, CISSP, CSSLP, ISO 9001 Tick-IT LA, ISO 27001 LA and a PhD in information security. With many articles, research papers, books and PC-games on security themes to his credit, he has been helping those aspiring for security certifications/ doctorate. Title: The Official ISACA course designed specifically for IT Management and Governance Date: Friday/Saturday, 30th and 31st January 2009 (9.30 am to 5.30 pm) Venue: PAI VICEROY; #1504, 16th Cross, 9th Main, 3rd Block Near Ramakrishna Hospital, JAYANAGAR, Bangalore - 560011, Tel: 080-26535400, Audience: IT Security and Control Professionals, IT Assurance Professionals, CobiT Implementation team, IT Process and Quality Consultants, CobiT Practitioners, Note: Class size is limited to the first 30 registrants! Workshop Objectives: Organisations need to understand IT Governance. This two-day workshop will concentrate on implementation aspects of IT Governance and focus on the use of CobiT to achieve this. The workshop is case study oriented and is designed to help you in understanding what it takes to implement the CobiT framework in your organization and how you can organize a route towards implementation of CobiT. This ISACA accredited CobiT workshop is for those who have a fundamental working knowledge of CobiT, but lack practical IT management and governance implementation experience. Learning Objectives: At the end of this workshop, attendees will be able to:

- Understand ITGI's approach to an IT governance implementation based on the IT Governance Implementation Guide, 2nd Edition.
- Understand the implementation road map and how CobiT and ValIT support each step of the implementation.
- Identify and know when to use the various components of CobiT and ValIT.
- Scope and plan IT governance initiatives based on CobiT and ValIT.
- Assess process capability using CobiT maturity models.
- Plan improvements using control objectives and control practices.
- Create a performance measurement framework using CobiT metrics and the balanced scorecard.
- Sustain the IT governance implementation.
- Consider practical implementation factors.
- Be aware of CobiT implementation support from ISACA

The Facilitator: Mr. A.Rafeq, FCA, CISA, CGEIT, CIA, CCSA, is an IT Governance and assurance professional with experience over 25 years in varied roles such as CFO, CIO, IT implementer, IT consultant, IT Auditor and CobiT Trainer. He is CobiT user and implementer for over 12 years and is a well-known CobiT evangelist. Rafeq has made presentations on IT Governance, IT assurance and CobiT implementation at international conference of ISACA across the world since a decade. He is a globally recognized trainer on CobiT and has conducted more than 100 days of training on CobiT. He is well-versed with various components of CobiT and his workshops are popular for de-mystifying and simplifying CobiT usage. Rafeq is founder secretary and past president of ISACA, Bangalore chapter. He is member of CGEIT Certification Board of ISACA, USA and Chairman of ISACA, GRA Task Force, Asia. Prerequisites: The attendee should have passed the CobiT Foundation Exam before attending this workshop. Those who have attended 1-day workshop on CobiT conducted by ISACA, Bangalore chapter are eligible to attend the workshop without passing the CobiT Foundation Exam. Registration is subject to acceptance and fulfilling the conditions. Course Material would include;

- Copy of Presentation Slides and Case Studies
- Extracts from CobiT 4.1 Framework (Participants may be download and bring soft copy of CobiT 4.1 Framework for the workshop. Available as free download for members and on for free registration for non-members).
- IT Governance Implementation Guide: using CobiT and Val IT costing USD 55/- for members and USD 110 for members. COBIT 4.1 for IT Governance and IT Assurance – a step by step methodology

Date Saturday, 20th December 2008

Venue PAI VICEROY

#1504, 16th Cross, 9th Main, 3rd Block
Near Ramakrishna Hospital, JAYANAGAR
Bangalore - 560011, Tel: 080-26535400,
Email: enquiry@paihotels.com; www.paihotels.com
Time 9.00 am to 6.00 pm

Fees Rs. 1,500/- for Members and Rs. 2,000/- for Non-Members (Inclusive of Course Materials, Refreshments and Lunch)
Seminar Objectives: The primary objective of this workshop is to present the participants with a practical perspective of using the COBIT 4.1 as Control and IT Governance Model for benchmarking and providing proactive assurance. Through case study discussions, participants will learn a systematic approach and implementation strategy on how to effectively use and efficiently integrate COBIT Model into their audits as required. Participants will learn how to implement COBIT 4.1 as the IT Governance model to which they can link their enterprise-specific operational and control requirements, policies, and standards. Participants will learn the step-by-step methodology designed by the speaker based on his extensive experience in using COBIT for IT Governance, IS Assurance and consulting assignments. Note: Those who have attended this 1-day workshop are eligible to attend the 2-day official workshop on "Implementing COBIT for IT Governance"; without attending the COBIT Foundation course. Topics

1. Overview of IT Governance and COBIT
2. Understanding principles and components of COBIT 4.1
3. How to use COBIT 4.1 as control benchmark and for self-assessment

4. Practical approach to using COBIT 4.1 – step by step methodology

BCM-200: Fundamentals and Awareness Workshop on 23 Feb 08 Earn 7 CPE credits! - Download the forms BCM-200 is a ONE-DAY workshop, which gives an overview of the 10 Professional Practices, which is the globally accepted body of knowledge for Business Continuity Practitioners. Successful completion of the exam held on the last day will enable participants to apply for the BCCP Certification awarded by the Business Continuity Management Institute (BCMI). At best, a business disruption due to a disaster, emergency or crisis would lead to financial losses, penalties and legal liabilities. At worst, the organization would perish. This workshop will give you an outline of the steps involved and the terminology used in Business Continuity Management (BCM), which will help you to effectively support BC Plans in your organization. This in turn would reduce and mitigate the impact of business disruptions, leading to enhanced customer trust and confidence – a critical ingredient for long term success. Objectives: Gain an appreciation of the criticality of BCM, and its key drivers, Understand the BCM framework, terminology and the BC Planning Methodology. Identify the differences between BCM, Disaster Recovery, Crisis Management and Emergency Response Understand the globally recognized and widely accepted 10 Professional Practices framework Walk through the critical steps involved in creating a Business Continuity Plan, such as Risk Analysis, Business Impact Analysis, Recovery Strategy and Plan Development Appreciate the essential steps in Program Management such as Awareness and Training, Exercising, Testing and Maintenance and Plan Updating Certification: The 90 minute, 50-Multiple Choice Question (MCQ) based examination is conducted on the last day of the workshop. Attaining 75% minimum pass marks would enable participants to apply for the Business Continuity Certified Planner (BCCP) certification awarded by the Business Continuity Management Institute. Audience: This workshop is ideal for professionals who want an overview of BCM in order to support the BC Plans in their organization. Target audience is Professionals who want to understand the concept and criticality of Business Continuity Management, to either support the goals of their organization, or for their own professional development, through an International certification - a key differentiator that will set them apart from their peers and colleagues. BCM is critical for all organizations, big and small, across all industries, specifically those that are highly competitive or regulated, such as IT, Financial Institutions, Healthcare, Services sector, BPO, Call Centers, Manufacturing, Utilities and Retail amongst others. Pre-requisites: Minimum of 1 year of work experience, No prior BCM / DR experience required Fee:

- Rs. 8990/- Members Register Online

- Rs. 11,240/- Non Members Register Online

Implementing COBIT® using ISO Standards - Click to register
COBIT® is a passionate term for all of us in ISACA®. But implementing COBIT® has remained a dream or has been effective in selected areas only. There are COBIT® certification courses available for the individual. However there is no opportunity if an organization wants to be certified to COBIT®. COBIT® is registered trademark of ISACA®
Course Objectives

- At the end of the course, attendees will be able to:
- Define the Scope of COBIT® implementation.
- Prepare a Project Plan for COBIT® implementation
- Perform a formal risk assessment
- Select relevant Process Areas from COBIT® and the controls therein
- Implement COBIT® within the defined scope
- Monitor and audit the management processes using COBIT®
- Demonstrate Project Management skills
- Contribute to business improvement through continual improvement techniques
- The practical emphasis of the course will provide substantial inputs to individuals.
- It is designed and delivered using a competency based training approach; this means we guarantee application of learning by assessing the skill knowledge and attitudes of participants; Who should attend?
- Those who plan to implement COBIT®
- Information Security Professionals (CISA®/CISSP®) Prerequisites

Previous exposure to ‘COBIT® mapping overview – 2nd Edition – August 2007 is desirable. About the Trainer Mr. M.N. Sudarshan is an Electrical Engineer from BMS College of Engineering, Bangalore and has worked in the managerial cadre for 33 years in six industries. He has 20+ certifications from professional associations including CISA and CISM. He is among the first batch of CISAs from India. He promoted the formation of new chapters of ISACA in Mumbai, Delhi, Bangalore and Riyadh.
